

I have XM radio and I really enjoy it!! Instant Traffic & Weather is not any type of local programming and that is the biggest reason I have it. I escort oversize loads nationwide, and this really comes in handy. Otherwise, I have to constantly search for a local station with information that I need, and then I cannot pay attention to the load and the other drivers, causing a hazardous situation. Don't approve the petition!! XM is not doing anything wrong!! This is what we need and deserve!!

Thanks for listening, and, yes, I am a registered voter and I exercise my right to vote. Don't approve petition 04-160!!
